KNIFE STEEL SELECTION AND PERFORMANCE

PREMIUM QUALITY STEEL

We offer a wide selection of fine made knives for cutting nearly any type of wooden material. Our knives are made to exceed industry standard and provide trouble free long run performance even under heavy feed rates. We stock and sell tens of thousands of knives per year and our large sales volume allows us to offer unbeatable prices. Knives are true high grade A.I.S.I. mill run steels that are salt bath hardened and triple draw stress relieved for greater consistency. Knives are precision ground and corrugated on advanced CNC creep feed crush grinders for perfect bar to bar consistency.

STEEL **PERFORMANCE**

D2-HCHC — D2 High Carbon and High Chrome (AISI) knives offer the best value for many moulding producers and planer mills. With a Rockwell C hardness (HRC) of 58; it is easy to grind and resists nicks in knotty soft woods. D2 contains 12% chromium to resist chemical erosion when cutting wet cedar or redwood. Great for softwoods and shorter runs in hardwoods.

V2-HSS — V2 High Speed Steel has extra Vanadium for long life. V2 has the same wear life and performance as M2-HSS, but at a lower cost. By increasing the levels of Vanadium to replace more expensive Molybdenum; we have developed a blend of steel with excellent tool life and the lowest price of any HSS on the market. V2 has a 63 HRc and is easy to profile shape. Great for long runs in soft or hardwoods.

M2-HSS — True grade M2 High Speed Steel (AISI) steel has a 25% longer run time than D2-HCHC grade. Our Premium M2-HSS offers high levels of Tungsten (6% W), Molybdenum (5.5% Mo), and Vanadium (2.2%V). M2-HSS is hardened to 63 Rc for better wear resistance in harder woods. Great for long runs in soft and hardwoods.

BLACK NITRIDE — BN High Speed Steel is our premium HSS with case hardened (carbon nitride) and black oxide to resist pitch build up. BN-HSS offers up to 100% tool life increases over standard HSS, without being harder to profile shape. BN-HSS features a long wearing cutting edge .010" deep that is more than 72 Rockwell C hardness. Much like Opti™ Knife. Great for long runs and stubborn hardwoods.

M3+ HSS — M3+ High Speed Steel offers up to 100% longer tool life over M2-HSS. This super alloy steel is great for long runs or on tough hardwoods. M3+ HSS contains high levels of Vanadium, Tungsten, Molly, and Chromium for extended wear life. Treated to 66 Rc hardness which is one of the hardest HSS offered.

V2-HSS +RW — Coated V2 High Speed Steel provides ultimate value and long tool life. By applying the hard long wearing diamond dust chrome coating to the face of V2-HSS you can increase wear life 100% at a small additional cost. Our RW coating offers a 72 Rc hardness to the cutting edge which increases wear life without increasing your grinding time. The RW coating is a proprietary electroplating process that adds 0.001" thick chip resistant coating. This line of steel is great for most hardwoods and can triple tool life in wet woods that contain tannic acids (oak, cedar, redwood).

ENDURANCE ER+ — Our "Endurance" (ER+ Grade) moulder steel is the best option for extended production time and tool life. An excellent choice for cutting problem hardwoods and for super long production runs. Tool life is increased up to 800% over normal High Speed Steel without the inconvenience associated with using carbide knives. This proprietary knife coating process uses the latest technology developed in Europe for metal working tools. An ion sputtering magnetron chamber applies a P.V.D. (Physical Vapor Deposit); 6 layer film of Titanium, Ceramic crystals, and other elements to the knife surface to form an extremely hard and heat resistant cutting edge. The hardness of the coating is greater than 3500 HV - about twice as hard as C2 grade carbide, but because the coating is so thin, normal vitrified or CBN grinding wheels can be used to profile sharpen the knives. Great for short runs (500 to 1000 feet) cutting MDF, Teak, Ipe and even Angire. NOTE: To avoid removing the wear resistant coating, a wood block should be used to deburr the profiled knives instead of an abrasive slip stone.

CARBIDE — We offer many grades of carbide that wear more than 1,000% longer than M2-HSS - See page 8 for more details.

- Coating Options: * RW Diamond Coat (72 Rc) HSS to double tool life.
 - * Black Nitirde / Carbonize (72 Rc) M2 or V2 to double life.
 - * Flash Hard Chrome Coat (72 Rc) D2 or HSS to cut Wet Cedar & Redwood.

We offer premium knives at better prices and stock over 10,000 knives for same day shipping. Below are most of the common sizes of corrugated knife stock, however we can supply additional sizes and grades for your specific needs. We also offer made to order sizes and grades; call for details. In addition most knives can be treated or coated for extended wear life. Let us know how we can earn your business!

*Quantity Discounts Offered.

Knives can be cut to length for a small fee.

5/16" D2 is Bottom Bevel

ATLAS M2 is made in Europe from true grade German M2

See Price Sheets for Bottom Bevel V2-RW

Bevel face bottom option offered on D2-HCHC and V2-HSS+RW 5/16" corrugated back knives. This allows for a greater pocket depth initially in Weinig and other German brand heads.

KNIFE-LOCK CARBIDE MOULDER KNIVES

Lower Prices and Longer Lengths Efficiently manufactured to 310 mm long knife lengths

High Strength C3 Micron Grain Carbide

~400,000 PSI transverse rupture strength, 1630 HV10 / 92 RA

Knife-Lock is a high precision carbide moulder knife system for millwork manufactures who cut glue lines, hardwoods, and Medium Density Fiberboards (MDF). Knife-Lock knives are compatible with your existing Wisconsin Knife Style steel backing plates. The carbide knife locks and indexes up on a corrugated High Speed Steel backing support plate as it is resharpened. Polished to mirror finish, our C3-Micro Grain carbide knives offer finer material wood finishes and longer production runs while providing longer diamond grinding

wheel wear. The backing plates are a one time purchase, only replacement carbide knives are needed as they are sharpened away. Our carbide knives are also 100% compatible with your existing backing plates. Knives and backing plates are CNC ground on creep feed crush grinders for precise locking, closer balance tolerances from knife to knife, and less initial grinding. Compare our price, selection, quality, and our responsive order delivery and you will see why so many MDF millworkers use *Knife-Lock*.

For backer only add "B" to set part #. To determine backer pricing, subtract the carbide price from the set price. 65mm Tall Knives also offered: Add 8% over 60mm wide prices.

GERMAN STYLE EURO-LOCK MOULDER KNIVES

The ultimate carbide moulder knife system for high production millworkers who cut Medium Density Fiberboard (MDF). *Euro-Lock* knives are compatible with your existing Weinig Knife or Leitz Style steel backing plates. Advantages over the competition include the use of a super strong *C3 Micro-Grain* carbide with higher hardness for longer production runs and our backing plates are the only ones made from high grade M2-High Speed Steel_for greater carbide support. Our competitors use softer steel backers that can bend and require additional deburring. Our backers have extended corrugations to allow the backer to be raised up in the knife pocket for additional resharpenings.

Euro-Lock knives and backing plates are CNC ground on the latest crush grinders for greater accuracy, precise index locking, & closer balance tolerances with polished knife faces to a mirror finish to improve the edge sharpness that results in finer material finishes in MDF. Our knives offer the best choice for reliable trouble free performance.

Lower Prices

Factory direct sales. If you can find a lower price we will beat it! Quantity discounts offered!

Quick Delivery

Most orders ship the same day if ordered by 12:00 PST

Larger Selection

Special widths up to 70mm and Lengths up to 300mm (11.81")

Experienced Technical Support

Low cost knife profiling services, grinding wheels on page 55.

Knives can be cut to length for a small fee.

Carbide runs up to 10 times longer than the best High Speed Steels. Great for hardwoods, long run surfacing, and MDF profiles. We offer a complete line of stock and custom made carbide knives, solid carbide strips, Indexable carbide, and Micro-Grain carbide inserts or turnable blades for most cutter head styles. For grinding we even developed special CDX Diamond grinding wheels for sharpening carbide inlay knives. Standard Knives are offered in Corrugated back (60°) and Smooth back planer knives. Pre-ground / Profiled Moulder knives (wire EDM or Profile ground) are offered to save you time. Knives below are stocked in long bars but can be cut to length as needed.

Titan High End Stock!

We offer a wide selection of precision made smooth back moulder knives and planer knives. Standard grades and sizes shown, but made to order sizes are offered as needed. Square edge and bevel edge moulder knives are stocked in the wider sizes for hand grinding. Long bars can be cut to length & balanced in head sets.

Knives can be cut to length for a small fee.

PLANER AND JOINTER KNIFE SETS

We offer a large selection of high quality planer and jointer knife sets in HSS and TCT Carbide tipped (10mm wide tips). See page 13 for Electric Handheld Planer Knives.

Spare Screw (T25)	MS-KS-LC
Spare Insert (15x15x2.5) with Screw (T25) *Sold in boxes of 10	IC-251515-DL

CARBIDE INSERT KNIVES (ICK)

We offer a wide vareity of sizes of square and rectangular carbide insert knives for disposable knife insert cutterheads such as spiral / helical moulder heads, planer and jointer journal heads, and custom tooling applications. We stock thousands of inserts for quick delivery to help you stay up and running. Inserts are made from long wearing C3 carbide and polished to a mirror finish for smoother cutting and longer tool life. Several of our popular square inserts have a turning dot for helping keep track of knife rotation in the head. Additional sizes and grades of carbide are available upon request. Carbide inserts priced each (10 per box).

Combo Knife Fits Weinig™ Combo Head

Length	Part #
230mm	TK-P1598A-230

Solid Carbide - 8mm Wide x 1.5mm Thick. Made by Titan Knife

See page 26 for heads.

Love the quick change planer/moulder knife heads but hate the expensive replacement planer blades? We are here to help. We offer an alternate high precision, low cost supply of knives for Weinig/LeitzTM, Centro-lockTM and TerminusTM style cutter heads. No volume buy-in's (like the other guys) to reach a price level, just a great price on any quantity.

Offered in both **T1-HSS and Micro- Grain C3 Carbide** knives for 10 times the life. Precision knives made by Titan Knife Works. Exact fitting and smoother surface finishes.

Contact us for custom head inquiries.

HIGH PRODUCTION PLANER BLADES

- 30 Degree Bevel Edge
- Horizontal Finish Ground
- D2-HCHC (58 HRC)

We stock a wide selection of precision made planer knives cut and packed in balanced sets. Our knives are salt bath heat treated for true consistent hardness and horizontal ground to a fine finish to provide a smoother wood surface. Standard 5/32" thick in 2" and 1-3/4" widths stocked in standard grades and stock lengths. Priced per knife. Call for additional grades and sizes.

*ST-1 Revo is a proprietary ultra long running grade. Please contact us for more details.

*Sand blasting available on D2 and M2. Surcharge and 10 week delivery apply.

*Hard wear layer coating option for wet woods is also available for D2 and M2.

L AND LV SIDE HEAD EASED EDGE KNIVES - STANDARD

We offer the highest quality L and LV eased edge side head planer knives at the lowest price. Made from high grade high Tungsten steel and salt bath heat treated for consistent hardness. All knife cutting surfaces are precisely ground to produce a smoother finish. After heat treating we finish grind the top, face, and eased edge radius sections of the knife for more accurate cutting than milled knives. Also, our knives are easier to setup and axial align in the cutter heads because both side edges are precision flush ground. Give us an opportunity on your next order; you won't be disappointed. **RW Coating now offered for extended life. Call for details.**

CUSTOM EASED EDGE AND PATTERN KNIVES

We offer custom made L or LV Tail style knives (bits) to produce any pattern with a cutting edge up to 6" long. Custom knives can be made to replace an old worn out knife or to match a wood sample or profile drawing. They are precision made to order from long wearing 12% Chromium grade D2-HCHC, hardened to 59 Rockwell C, and can be produced normally within 6 weeks of drawing approval.

Allow 6 weeks for delivery.

Single or Double Prong

Tongue, Groove and Complex Profiles

(Dove Tail Clamp) Corrugated Base

For Yates Cutter Heads Knives align themselves by tightening down the upper cutterhead disk.

For Gilbert Tech Planer Heads. Allow 4 to 5 weeks for delivery.

L or LV style knives can be easily face sharpened many times without losing the profile shape and they offer a stronger and more affordable cost than flat profile ground knives. Our knives are precision ground or wire EDM profiled to fine finish to provide consistent profile, a smoother finish over plain milled cutters, and are precision ground on each flat end to allow for precise elevation setting to ensure all knives in the head match.

The prices are calculated from the cutting edge length (L or LV Tail are the same price). Custom eased edge or profile knives are the same price. Call for price quotes on profiles over 1" deep and for special quantity discounts. We can produce taper milled knives to avoid resetting the knives after sharpening, or staggered milled profiles if you prefer. Staggered milled knives also available. A surcharge may apply.

Our customers tell us we offer the finest Williams and Hussey compatible moulder steel available. Accurate bolt hole locations that are CNC machined and 100% inspected to ensure perfect knife clamping. Fine horizontal surface finish allows for smoother cuts. These knives fit both Shop Fox and Williams & Hussey mini-moulders. V2-HSS is used for long production in hardwoods. BN is great for long runs and stubborn hardwoods. Call for prices on profile ground knives to your exact pattern. 2-3/4" width may exceed capacity on some W.H. moulders. Corrugated back knives allow you to use your profiled W&H knives in your shaper or moulder heads. Must have knife pockets at least 1-1/8" deep, to conceal holes, when using corrugated back knives. Call for M2 3/16" Thickness.

We now offer a line of cutter heads that allow you to use your existing Williams and Hussey knives on your shaper or larger high speed moulder. No need to order two sets of knives for each. Use all your existing W&H knives in these heads to match the exact profiles without having to order more corrugated back knives. Heads accept knives up to 1/4" thickness, 6000 rpm max. Heads include 3/8" bolts -placed on 1.0" centers.

Made to Order- Delivery about 4 to 5 weeks. Specify Bore When Ordering: 40mm, 1-1/2", 1-13/16", 2-1/8", 50mm

- Smoothest Finish
- Long Tool Life
- Easy To Use
- Easy To Sharpen
- Reduced Noise

The helical cutting action is the ultimate way to surface wood and will eliminate fuzzy and chipped out grain defects even in cross grain. The helix is a continuous compound shear cutting action that slices the wood with low tool pressure. Our SuperHelic heads use a simple one screw set gib design that wedges the corrugated HSS knives tightly using centrifugal force. All heads are currently right hand helix. New heads include a set of knives that are factory sharpened in the head for closer cutting concentricity. Knives can be re-sharpened many times.

Tool Rests for SuperHelic Knives

SPIRAL INSERT KNIFE SURFACING HEADS

Quiet Cutting: Looking for a better surfacing head option? Spiral knife insert heads make constant contact with the material offering reduced cutting noise - typically 20 decibels less. Each long wearing carbide knife has four edges that can be dulled before replacement. These heads improve material finishes on cross grain, lower long term tooling cost, and eliminate sharpening costs. Our spiral heads offer special radius edge inserts to reduce any chance of knife corners marking your material. Heads are made from 7071-T6 high strength aircraft aluminum and dynamically balanced to 8,000 rpm. Heads include a set of carbide knives ready to run and a torx wrench for turning and replacing the knives. Heads use 15 x 15 x 2.5 inserts.

Head prices include set of knives. Most heads in stock for immediate delivery.

Spiral heads now come with face shear for smoother cutting.

See page 15 for insert knife listings.

Custom heads also available including hydro bore and self centering spiral heads.

HEAVY DUTY SPIRAL, REF ENGRAVERS, SIDE INSERT HEADS

NEW! Heavy Duty Spiral Heads

Features

- · Designed for aggressive wood cuts.
- Improved chip flow for efficient performance.
- Fewer knives to change and turn, saving time and effort.
- Easy knife changing gib system for hassle-free maintenance.

Applications

- Ideal for roughing cuts in hardwoods and softwoods.
- Suitable for use in woodworking shops, sawmills, and carpentry applications.

Turnable Knife Insert Side Heads

We offer several styles of insert knife cutter heads, made from 6061-T6 aircraft grade aluminum, for economical surfacing of material on smaller moulders and planers. Heads come with or without side cutting spurs (2 each side) for dado and rabbet cutting. Once the knives dull, you simply turn the blade around to the next sharp cutting edge - 2 or 4 life cutting edges. Once all usable cutting edges are dull, a new low cost long wearing carbide knife is quickly inserted. No need to purchase expensive sharpening equipment. This option offers one of the lowest cost ways to size and surface hardwoods. Call for additional prices. Heads come with set of knives. Spare knives on page 15.

QUICK-LOCK INSERT MOULDER HEADS

Surface and Profile with the same head

- Series 3 Heads (2 + 2 + 2)
- 6 Pockets / 3 Pocket Types
- **Quick Knife Setup**
- No Resharpening Needed
- Long Tool Life Carbide
- Affordable Replacement Knives
- **Extraordinary Surface Finish**
- **Light Weight Aluminum Alloy**

9300 Series Heads

The ultimate system for efficiency and versatility. Our Quick-Lock 9300 heads offer a total of 6-knife pockets; two surfacing knives, two pockets for profile knives, and two additional pockets that accept profile knife holders and low cost inserts for profiles. The 9000 series are for customers that are looking to only plane. Quick-Lock heads are dynamically balanced to 8,000 rpm.

Quick-Lock head prices include set of T1-HSS planer knives.

HEAVY DUTY MULTI-PROFILE INSERT TOOLING

Our heavy duty multi-profile insert heads accommodate a wide variety of profiles; including deep profiles. The HD design is especially suited for troublesome woods. The knife system incorporates 6mm thick backers for extra strength and the heads are 3-wing for increased durability. A groove cutter support prong can be added to the tool body for even more strength and durability.

60mm wide heads, knives, and backers are available for 3/4" thick flooring and are in stock for immediate delivery.

T&G Flooring - Face Down - Backer	60mm	IBHD-60-TGD			

Micro Bevel Knives use the same backers as square face flooring.

MINI-HD MULTI-PROFILE INSERT HEADS FOR SHAPERS

Mini-HD Multi-Profile Insert Heads for Shapers

Designed to be used on a spindle shaper; these versitle heads are ideal for projects including end work on flooring as well as cope and stick cabinet door profiles. A feature of 60mm wide heads is the ability to fit two profiles on one knife. It's like getting two knives for the price of one! Mini-HD Heads will accept the same knives and backers as the larger 3-Wing HD MP Moulder Heads.

60mm cutting length allows 2 profiles to fit in each knife.

Carbide Tipped Wing Cutters to PCD Diamond Cutter Heads

We have solutions to tool up complex door and window component manufacturing from profile ground wing cutters to insert type cutterheads in hydro or straight bore to fit your moulder, tenoner, or CNC router. If you need extended tool life in MDF or abrasive materials, PCD diamond may be the right choice. Diamond tooling can offer run times over 100 times longer than the best grades of carbide. The most common tools made with diamond tips are router bits, saws, groovers, and custom profile flooring cutter heads. We custom design and manufacture the best tool for each project to ensure high performance. Tools are designed based on an evaluation of your machine and material cut; then a detailed CAD conceptual drawing is used to illustrate the tool for your pre-manufacturing approval.

Raised Panel

Shaper Cutter

PRODUCT ORDER CODE

We offer a complete line of dual cutting angle moulder heads for cutting both hard and softwoods with the same tool - like getting two heads for

the price of one! This is the best choice for custom millwork producers who need the flexibility to handle any job at a moments notice without having to stock many different cutterheads.

Our stock heads are 12 degree cutting angle for hardwood to reduce raised grain, and 20 degree cutting angle to reduce fuzzing in softwoods. Only 2-knives are required

on non-jointed moulders, using 4-knives

will not improve the surface finish. We can also supply filler wedges for the empty unused pockets. All heads are precision CNC machined from high strength hardened alloy steel and designed to operate at speeds up to 9,000 rpm. Heads are made to exceed the most stringent European OEM standards allowing you to produce smooth material finish with years of trouble free use. Custom cutter heads can be produced with any cutting angle, body diameter, and bore sizes - call for prices.

Corrugated Filler Wedges and Reducing T-Bushings. See page 40.

Weinig, Wadkin, SCMI, IIDA, Leadermac, Woodmizer, Silver, and other Mid-Sized Moulders:

The S122 line, 4.80" body diameter, is designed for use on most European and Asian imported moulders using industry standard features and metric hardware. Plus we have added features not offered by the German tool makers such as a high alloy strong tool steel body for greater tool life and deeper knife pockets to allow wider and thicker steel to be used for additional resharpenings.

Dual Hook Moulder Heads 4-Knife, 12/20 degree

Shapers, Paulson, XL, and Import Brand Moulders:

The S100 dual hook line has a 4" body diameter with a 1-1/4" bore that is designed for spindle shapers and most smaller non-jointed moulders. These heads offer the flexibility to use corrugated knife steel with high rpm rotation to cut either hard or softwoods with the same head body. Bore bushings can be offered for shapers with 1" diameter spindles.

CORRUGATED STRAIGHT BORE MOULDER HEADS

We offer a complete line of straight bore corrugated pocket moulder heads that fit most moulders and shapers. We can make heads to any one of four different hook angles, special bore sizes and add special features. All heads are precision CNC machined from high strength steel and ISO GQ 1.0 balanced to 9,000 rpm. Heads exceed stringent European OEM standards to produce smooth material finishes with years of trouble free use. Choose your cutting angle 10, 12, 15, or 20 degrees or a combination of these in the same cutterhead for cutting both hardwoods and softwoods. Heads are made to order in about 4 weeks.

2-Knife Shaper / Mini-Moulder

(IN STOCK) Heads hold standard corrugated knives for smaller diameter shapers.

Straight Bore 3" / 76mm OD x 3/4" Bore or 3.5" / 89mm OD x 1" Bore, 15 Deg. Hook

HYDRO-LOCKING CORRUGATED MOULDER HEADS: 4 & 6 KNIFE

We offer an expansive line of hydro-loc moulder heads for high production moulders. You choose the cutting angle; 10, 12, 15, 20 degrees, etc. Made from high strength hardened steel, CNC machined to exact tolerances and balanced to run up to 8000 rpm. These offer finer surface finishes with the durability to withstand years of continuous use on high speed moulders. Heads are available in a variety of sizes and made to order in about 6 weeks. Hydro-Sleeves are made from high yield strength alloy steel to avoid deforming the sleeves over years of use. To avoid damage always use safety lock collars at all times. Do not exceed max. pressure on heads, do not pressurize heads on an undersized spindle, or spindles with keyways. Check pressure daily.

High Quality Lower Prices Quick Delivery

Weinig, Mattison, Wadkin, Diehl, Leadermac, and other jointed high speed Moulders:

The H150 line is for use on high speed jointed moulders. Offered in 4 or 6 knife pockets for feed speeds up to 300 ft per min. and up to 9000 rpm. Call for additional prices on custom designed heads with shear cutting angles, etc. Standard heads come with your choice of cutting angles and bore size. Heads are made in about 6 weeks to the cutting angle you need.

H150: Hydro Bore 5.9" / 150mm OD x 1-13/16", 2-1/8", or 50mm Bore

Weinig, Wadkin, SCMI, IIDA, Leadermac, Woodmizer, Silver, and other Mid-Sized Moulders:

These heads are used on moulders with larger spindles and larger cutting capacities. Heads are precision made to run to 9000 rpm and are dynamic balanced to ISO Grade quality 1.0. Heads are offered with all the industry standard features and metric hardware; knife pockets are designed to accept knife steel from 3/16" thick up to 10mm thick corrugated. Heads are made to order - you choose the cutting angle. Dual hook, or single hook on all 4-pockets for high speed jointed moulders. Jointed knife feed speeds up to 200 ft. per min.

H137: Hydro Bore 5.4" / 137mm OD x 1-13/16" Bore (Made to Order)

HYDRO-LOCKING CORRUGATED MOULDER HEADS: 8 & 10 KNIFE

We offer an expansive line of hydro-lock moulder heads for high speed production moulders. A standard line of 8 and 10 knife moulder heads. We can produce 12+ knife heads for Waco, Thundermac, and other high speed moulders and planers. Choose your cutting angle; 10, 12, 15, 20 degrees, etc. Heads are made from high strength hardened steel that are CNC machined to exacting tolerances and balanced to run up to 8000 rpm. Our heads have finer surface finishes with the durability to withstand years of continuous use on high speed moulders. Available are a variety of sizes to fit your machine. Heads are made to order in about 6 weeks.

High Quality Lower Prices Quick Delivery

Weinig, Wadkin, SCMI, IIDA, Leadermac, Waco, and other High Production Moulders:

These heads are used on production moulders with feed rates up to 350 feet per min. Heads are precision made to run to 6000 rpm and are dynamic balanced to ISO Grade quality 1.0. Heads have all the industry standard features and metric hardware; knife pockets are designed to accept knife steel from 3/16" thick up to 10mm thick corrugated. Heads are made to order - you choose the cutting angle. For the same price you can add axial constant 7mm wide side hubs to the heads. Additional features and custom designs can be added like additional outside diameter grease fittings, and deeper knife pockets, notched gibs, and square head gib bolts.

Metric Zerc Grease Inlet Fitting (New Style: Built-in O-Ring) Part # MH-GF-600-N

Weinig, Mattison, Wadkin, Diehl, Leadermac, and other jointed high speed Moulders:

The H195 line our line of 10 and 12 knife moulder is for use on high speed jointed moulders. Available in 4 or 6-knife pockets for feed speeds up to 300 ft per min. and up to 6000 rpm. Call for additional prices on 8 and 10-knife heads in the 163mm body diameter. Standard heads come with your choice of cutting angles and bore size. Heads are made in about 6 weeks to the cutting angle you need.

Hydro-Sleeves are made from high yield strength alloy steel to avoid deforming over years of use. To avoid damage be sure to always use safety lock collars at all times. Do not exceed max. pressure on heads, do not pressurize heads on an undersized spindle, or spindles with keyways. Check pressure daily.

Call for prices on 12+ knife moulder heads and smooth pocket planer heads for Newman, SR, Coastal, USNR, and Yates Planers.

With equal or greater quality, Titan heads are a more cost effective option.

JEFFER JF-330A PROFILE MOULDER KNIFE GRINDER

Jeffer JF-330A

We stock diamond dressers, tracing pins, tool rests, and other spare wear parts.

Additional arbor Mandrels are available.

Precision cross roller bearings are used.

17 Models of Knife & Saw Grinders Now Offered

We offer the full line of feature rich, precision knife, cutterhead, and saw grinders. Call for details and pricing.

Precision wood profiles require a precision profile grinder.

We offer the Jeffer JF-330A profile grinder for 1:1 profile grinding on all your moulding and planing knives. Designed much like the German profile grinders that utilize a template, with additional features at a much more competitive price. We sell this model loaded with all the extra features for no extra charge. The larger capacity is able to sharpen heads up to 12" long x 12" diameter. Standard features include; stainless steel flood coolant tank w/ 1/8 hp pump, .0002" tolerance cross roller bearing table, choice of mandrel diameter sizes, side clearance tilting, diamond point side dressing, 3hp adjustable grinding wheel RPM, and more! Uses CBN and Diamond wheels hubs, up to 10" wheel diameters. Installation and training can also be provided at your mill site. FOB Portland, OR. Call for pricing.

Features

- Turret Stylus System
- Axial Constant System

Jeffer JF-330A Specifications							
Grinding Capacity	Cutters 12" Long x 12" Diameter						
Work Table (Max.)	12.6" Travel Left to Right

SPLITTER SAWS AND RADIUS EASED EDGE CUTTERS

Splitter Saw and Radius Eased Edge Cutters For Moulders

"Splitter Heads" Rip, Groove, and Surfacing in One Pass

Don't have enough spindles? We offer custom made heads that can combine a moulder head and a carbide tipped saw to allow you to rip stock and surface on the same spindle, or allow you to ease edges and rip for square production. Also commonly used to cut a weather strip groove without the hassle of breaking moulder knife splitters - 0-deg. radial carbide tip saws cut smooth grooves and last thousands of feet longer. Call for prices and details for your specific application. We can provide good solutions for nearly any product run.

Warning: The use of splitter saws on moulders requires you to have anti-kickback devices installed to prevent possible injury to the infeed operator.

LASER FORMED PCD SAW BLADES

NEW! Taking PCD saws a giant step forward!

Discover the cutting-edge performance of our laser formed PCD (Polycrystalline Diamond) saw blades. These blades redefine excellence in material cutting. Whether you're a professional carpenter, cabinetmaker or millworker these blades are your ultimate companion.

Unrivaled Longevity - Laser formed teeth cut better and stay sharp longer than standard eroded teeth. PCD blades are renowned for their durability, expected to last 25X longer than carbide. But our laser-formed PCD blades go even further, lasting 10X longer than standard PCD blades.

Exceptional Finish Quality - The laser forming process optimizes tooth geometry to ensure precision cuts, even through the toughest materials. KLT design eliminates virtually all chip out, eliminating the need to use scoring blades.

Affordable Excellence - Quality doesn't have to break the bank. Our laser formed PCD saw blades strike the perfect balance between performance and affordability. These blades are inexpensive enough to be disposable, considering price and run time.

Minimal Downtime, Maximum Productivity - Say goodbye to frequent blade changes. With extremely long uptime, you'll spend more time cutting and less time swapping saw blades.

Ideal for a wide range of applications, including:

- · Hard and Soft Wood
- Melamine
- MDF (Medium Density Fiberboard)
- Laminate Panels

- Engineered Flooring
- Cement Fiberboard
- · Composite Decking

SAW BLADES

We offer over 450 different stock saw blades for quick delivery. Made by the finest manufacturers that have proven to exceed every expectation. Blades are made with a high nickel heat treat hardened saw plate that is laser cut and polish ground for perfect flatness. Long wearing Micro-Grain carbide teeth are brazed and ground using the latest CNC robotic controlled processing line. Each blade is inspected to ensure high quality. Blades can be modified quickly to enlarge the bore size to fit your machine spindle. Additional blades are offered for your exact requirement. Call for prices and details on custom made saws that can be produced in about 4 weeks. Large quantity discounts offered.

Rebore Extra Chipper

Alternate Top Bevel ground teeth provide a fine cut in natural woods. Works well in most applications, trimming, chopping, and cross-grain cuts.

Triple Chip Ground saws provide a stronger tooth for greater life. Also for use in cutting both natural and composite woods like plywood and MDF.

PCD Tipped saw blades will outlast carbide tipped over 100 times! Great for cutting Hardiplank cement siding. Call for custom diamond saws and groovers.

Saw Collars and Saw Spacers

We can supply the complete package of gang rip saw spacers in steel or aluminum, and custom made saw collars to fit your existing moulder, or gang rip saw. Call for price quotes.

Warning: The use of saws on moulders requires you to have anti-kickback devices installed to prevent possible injury to the infeed operator.

MOULDER HEAD ACCESSORIES

Filler Wedge Bars

Filler Wedges cut and balanced in pairs to fit popular cutterhead lengths are available. They are used to fill unused pockets in a cutterhead preventing bore distortion caused by uneven tightening of the gib screws.

Pre-Cu	t and Ful	l Bar Fille	r Wedges
Thick	Height	Length	Part #

MOULDER HEAD ACCESSORIES AND PARTS

Self Centering Sleeve (SCS) Bore Moulder Heads

For older domestic made moulders we offer mechanical centering cutter heads; Self centering sleeves (SCS), Cone and Collet, Straight, Taper bore heads. We can provide heads with custom features like: Contour O.D. heads, shear cutting angles, saw style splitter heads for in line rips or notching, taper diameter heads for Crown mouldings, and more. We offer spare parts, custom made gibs, gib screws, and used heads.

Moulder Head Accessories: Gibs, Screws, Hydro Sleeve Parts, Repairs

We offer replacement parts and can service damaged heads. We offer metric thread 1/4" square head gib screws to replace your existing European metric Allen gib screws - eliminates cleaning plugged pine pitch from allen screws! We also offer Wrenches, Sleeve kits, Spare SCS sleeves and nuts, Safety Lock Rings, Spindle spacers, and much more.

HYDRO-LOCK SLEEVES: B STYLE

Hydro-Sleeves for Cutterhead Centering and Saw Sleeves

High precision, lower cost solution for centering insert cutterheads, spiral heads, and saw blades on production moulders, tenoners, and rip saws. CNC machined from high strength alloy steel for long wear life. Titan sleeves are dimensional matches to the popular ETP™ brand, and use a welded sleeve design. Custom size sleeves offered - call for prices. Custom size sleeves can be made to meet your special requirements. Volume discounts are offered on 5+ pcs, mix and match sizes. Many other types of Hydro Sleeves offered. Please contact us to receive a dedicated hydro sleeve catalog.

Safety Lock Collars

Rectangular safety lock collars are used on hydro-lock moulder heads. Round safety lock collars are used with tool sleeves.

Steel spacers for the hydro-sleeves to allow indexing rip saws apart or to fill excess sleeve capacity. Spacer nuts have 3 bolt holes with 3/8" NC threads. Index spacers are drilled for (3) 10.5mm holes.

HYDRO-LOCK SLEEVES

Titan Hydro-Lock Sleeves are a welded design for the highest performance and are dimensional matches to the popular European style. Ask about our Hydro-Sleeve Catalog for detailed listings.

The BI type Hydro-Lock Sleeve is designed for interchangeable tool assembly which can easily be switched between the tools such as straight bore cutterheads, saw blades on moulders, tenoners, and rip saws. No grease pump needed.

The C type Hydro-Lock Sleeve is designed for interchangeable tool assembly which can easily be switched between the tools.

The CI type Hydro-Lock Sleeve is designed for interchangeable tool assembly which can easily be switched between the tools.

The CIL type Hydro-Lock Sleeve is designed for interchangeable tool assembly which can easily be switched between the tools and includes an integral aluminum saftey ring. Screw pressurizing system.

The A type Hydro-Lock Sleeve is designed for permanent assembly for different kind of tools.

The AI type Hydro-Lock Sleeve is designed for permanent assembly for different kind of tools. Screw pressurizing system.

The EIA type Hydro-Lock Sleeve is designed for permanent tool assembly and machines with hexagonal spindle profile. Double end tennoner / PCD tool.

The EIB type Hydro-Lock Sleeve is designed for interchangeable tool assembly and machines with hexagonal spindle profile.

The EIC type Hydro-Lock Sleeve is designed for interchangeable tool assembly and machines with hexagonal spindle profile.

AIL type Hydro-Lock Sleeve.

HIGH PRESSURE GREASE GUN - NEWEST MODEL

Wanner Model 32391 Offers Best Reliability:

The newest Swiss made high pressure grease gun has an operating pressure of 600 bar and are used to pressurize hydro-locking heads and sleeves. Model 32391 has a center filtered aspiration valve, replaceable pressure valve seat, 1,000 bar pressure hose, improved pressure release valve, lighter weight plastic handle, and more. Spare replacement parts for the older and new version pumps are also available.

Spare	Parts for Older	Rod Pump
Pos. #	Description	Part #
1	Gage 600 Bar	M-06-83746
2	Washer	M-06-80128
3	Rotary Coupling	M-06-32325
4	Washer	M-06-80365
5	Steel Ball	M-06-82010
6	Torsion Spring	M-06-81699
7	Spiral Pin	M-06-84684
8	Valve Seat	M-06-43448
9	Prim Pin	M-06-84630
10	X-Ring Seal	M-06-82495
11	Piston	M-06-32340
12	Lever	M-06-30647.01
13	Valve Head	N/A
14	Aspiration Valve	M-06-33716
15	Barrel Seal	M-06-80657
16	Supporting Disc	M-06-38080
17	Low Pres. Piston	M-06-38075
18	Cylinder	M-06-38004
19	Insert	M-06-38089
20	Pressure Spring	M-06-81771
21	Cover	M-06-38013
22	Piston Rod	M-06-38078
23	Security Disc	M-06-84808
24	Hydraulic Connector	M-06-36590
25	Hose - 12" Long	M-06-35143.00
26	Filler Cap	M-06-35690
27	Seal	M-06-80266
28	Pressure Rel. Screw	M-06-32308.01
29	3/16" Steel Ball	M-06-82010
30	Air Release Valve	M-06-35595.01
31	Cu-Joint	M-06-80198
32	Pressure Spring	M-06-81358
33	Copper Seal	M-06-82666.01
34	O-Ring for Valve Seat	M-06-82205
35	Spring Pin	M-06-32339
36	Plastic Backer Plate	M-06-38148.01

Spare	Parts for Older	Chain Pump
Pos. #	Description	Part #
1	Gage 600 Bar	M-06-83746
2	Washer	M-06-80128
3	Rotary Coupling	M-06-32325
4	Washer	M-06-80365
5	Pressure Spring	M-06-81384
6	Torsion Spring	M-06-81699
7	Spiral Pin	M-06-84684
8	Valve Plug	M-06-30643
9	Spiral Pin	M-06-84630
10	X-Ring Seal	M-06-82495
11	Piston	M-06-32340
12	Lever	M-06-30647.01
13	Valve Head	N/A
14	Non-Return Valve	M-06-30508
15	Barrel Seal	M-06-80657
16	Cylinder	M-06-38004
17	Piston Seal (Red)	M-06-83576
18	Joint Pad	M-06-80162
19	Guide	M-06-32329
20	Support	N/A
21	Pressure Spring	M-06-81763
22	Chain .6m	N/A
23	Spiral Pin	M-06-84681
24	End Cover	N/A
25	Lining	N/A
26	Flat Washer	M-06-82741
27	Pressure Spring	M-06-81656
28	Handle Kit	M-06-30732.00
29	Hydraulic Connector	M-06-36590
30	Hose - 12" Long	M-06-35143.00
31	Cover Plug	M-06-30642
32	Washer	M-06-80266
33	Press. Rel. Screw	M-06-32308
34	3/16" Steel Ball	M-06-82010
35	Air Release Valve	M-06-35590

VITRIFIED PROFILE GRINDING WHEELS

The full line of moulder knife profile grinding wheels and can suggest a grinding wheel to match the grinderman's experience, the grinders RPM and the steel hardness. Normally the harder the wheel (and the faster the RPM) the longer wearing the wheel is, yet harder wheels load quicker and can burn knives. Also available are coarse wheels for roughing profiles and fine wheels for resharpening. A coarse wheel at a higher RPM can also help provide a finer finish grind.

Now Offering European and Lower Cost USA Made Wheels.

Call for additional sizes not shown above.

Weinig Grinders: Rough grind patterns at about 1,800 rpm (slow rpm if knife burns). As wheel wears RPM can be increased to 2,100 RPM. For finer finish grinds with a coarse wheel increase RPM to 2,600+ RPM.

COLOR

White Grain Aluminum Oxide: Very Fast and cooler grinding, but faster wheel wear.

Premium Gray Aluminum Oxide: Fast grinding, longer wear than white grain.

Oxide: Longer wearing than Gray wheel - little

Pink Chromium

Gray wheel - little harder (better value).

Blue Ceramic:

Long wearing - about twice the life of white oxide wheels.

Purple Ceramic:

Ceramic and Pink grain mix - wears like Blue Ceramic but at a lower cost (better value).

CBN AND DIAMOND PROFILE GRINDING WHEELS

Super Abrasive profile wheels offer the longest wheel wear and the finest finishes. Listed are the most common stock wheels, we can also make custom wheels to your grit and hardness spec's.

CBN

Borazon, use to finish grind and sharpen steel knives, run at fastest RPM possible, 3,000+.

NCD Diamond

Use to finish grind and resharpen solid carbide knives, run at 3,000 rpm max.

CDX Diamond For carbide inlay

For carbide inlay knives; resist plugging with soft backing steel, 3,000 rpm max.

Made to order Diamond and CBN wheels.

A huge selection of custom made long wearing diamond, CDX diamond, and CBN Borazon grinding wheels including nearly 1,000 different styles and combinations of custom specs to maximize life along with grinding finish. Quick deliveries on non-standard custom made wheels. Many ship the same day from stock. Call for prices on your high consumption wheels for the lowest prices, highest quality, and consistency. Private label available.

CBN AND DIAMOND WHEELS - MADE TO ORDER

We offer a huge selection of custom made long wearing diamond, CDX diamond and CBN Borazon grinding wheels including nearly 1,000 different styles and combinations of custom spec. grinding wheels to maximize wheel life and grinding finish to choose from. Quick deliveries on non-standard custom made wheels. Many wheels ship the same day from stock. Call for prices on your high consumption wheels for the lowest prices, highest quality, and consistancy. Request our Diamond Wheel Catalog for more detailed information.

Core Shapes

The first number call out indicates the core shape. (ie. 1A1)

Bond Shapes A F FF V K C

The second letter call out indicates the bond shape. (ie. 1A1)

Bond Location

14EE1

The third number call out indicates the bond location. (ie. 1A1)

Abrasive Types:

CBN

Diamond for carbide

CDX for carbide with steel backing.

Grit Size:

60-80 for roughing / quick removal 100-200 for most applications 220-1,500 for finish grinding / lapping

Hardness: Soft J,K,L to Hard T,U (R hardness standard)

Concentration: 50-125% Bond Depth: 1/8"-1/2"abrasive

POLYURETHANE AND STEEL MOULDER FEED ROLLERS

Most Weinig Moulders use one of three diameters: 140mm (5-1/2") or 170mm (6-11/16"). We also offer a 150mm diameter roller that some millworks use in place of the 140mm to increase the maximum feed speed. Re-coated tires can lower replacement costs.

The replaceable tire system offers quick change outs without the hassle of re-coating your old tire hubs. Most sizes in stock. Call for other sizes and types offered. Steel hubs are a one time purchase. Replacement tires can be stocked and changed quickly without having ship and wait for re-coated tires. When ordering please specify bore size (35mm or 30mm ID) and keyway size (10mm standard).

PATTERN AND SURFACING JOINTING STONES

Fine European and American made pattern jointing stones for most high speed moulders and planers. Stones in stock, for quick delivery, along with many special application stones. Hard to find wide, long, round stones and Diamond/CBN stones for jointing carbide or ceramic knives are also available.

Resin Stones:

Best Finish Quality. React Harder.

Vitrified Stones:

Cooler Honing. More Aggressive.

^{*} Stones for both Domestic & Weinig

Metric size fine grit, soft stones are for Weinig, Wadkin and Leadermac moulders. Coarser, Hard stones are for Mattison, Diehl, Tri-State, and other American moulders.

Fine grit stones offer a smoother finish while coarse grit stones wear longer and are aggressive.

SCALES, GRINDING COOLANTS, CUTTERHEAD CLEANER

Balance Scales

Digital balance scale makes it quick and easy to cross balance knives and cutter head parts. We offer close tolerance digital weight scales, trip, and triple beam balancers for cross balancing

knives and head parts to within 0.1 grams. Scales are helpful in eliminating joint or material finishing problems created from improper balancing. Save your machine spindle bearings by balancing your knives. Standard scales for balancing knives, gibs, bolts and screws, and other critical components. Call for prices on other scales.

Lineal Footage Counter for Moulders

Don't waste time counting stock for billing or inventory - Measure it! We offer the "*TruMeter*" heavy duty lineal material footage counter. Several models are offered - note if you mount to "in feed" or on the "out feed" fence side. Standard units count to 99,999 ft. These counters offer the best choice in accuracy and long term reliability.

Balance Scales					
Model #	Max. Weight	Accuracy	Part #

Grinding Coolants and Bed Lubes

A safe to use, heavy duty synthetic grinding coolant for profile grinders, face grinders, and straight knife grinders. Our diverse line of coolants work very well when grinding hardened tool steels and carbide by reducing heat, inhibiting rust, reducing cobalt leaching, and reducing wheel loading. Our coolants are concentrated and mix 40:1 with water. We also offer a special additive that improves grinding finishes and extends diamond wheel life.

Saw Blade and Cutterhead Cleaner

We offer a proven saw and cutter head cleaning solution and rust inhibitor that is effective at removing pitch and resin. "Blade Clean" is safe to use in your existing soak tanks, providing a non-toxic yet very effective alternative to harsh paint and rust strippers. "Blade Clean" has been proven safe to use with Hydro-locking cutter heads Concentrate is diluted with 5 parts water. Blade Clean can also be used to clean glue and machine parts. Caustic to Aluminum.

Description	Part #
1 Gallon	BLADECLEAN
6 Gallon Pail (Makes 30 Gallons of Cleaner)	BLADECLEAN-PAIL

We also sell ultrasonic and heated soak tanks.

TEMPLATES AND TEMPLATE SUPPLIES

Made to Order Templates

Short of time? Let us help by making your profile grinder templates. Send us your drawing or pattern number and we can ship most templates the next day. We offer template making steel, or ready to use pre-made custom profile grinding templates from hardened steel. Q.C. checking gages and jointing stone grinding templates can also be made to improve product consistency. Hard steel templates offer great strength and 10 times longer wear life over plastic.

Precision Measuring Tools, Gages and Complete Tool Room Supplies

We offer nearly anything you would need to make precision moulder knives and steel templates. Our list of support supplies includes measuring gages, calipers, files, stones, and much more. We also sell inspection and measuring equipment like eye loops, certified straight edges, hook rules, precision machinist squares, shim steel, music wire, micrometers, and much more. A full line of industrial supplies; from cut proof gloves to lay-out dye, and from straight edges to a full line of safety supplies to protect your eyes and lungs when grinding. Call for more measuring tool options.

6" Digital Calipers (.0005")

12" Digital Calipers (.0005")

Files help shape your jointing stones to profile. Standard high quality files are offered plus we have a line of Diamond Electroplated long wearing files. Diamond files come in 3 sizes and many shapes all coated with ~ 200 grit diamond that never seems to wears out. Call for prices and details on the size you prefer.

MOULDER KNIFE GRINDING PARTS AND EQUIPMENT

We sell the complete line of grinders and support accessories; profile, bench and pedestal grinders and setup stands. We can provide knife chop saws, template making equipment & optical comparators for pre-run knife inspection. In addition we provide the grinder spare parts and accessories like wheel dressers, belts, scribes and various support items to help in making moulder knives.

Measuring Stand Part # 230-1

Used to measure the cutter radius of profile moulder heads to preset the spindle digital counters for quicker setup.

PROSTAND HD™ AND PROFILED MOULDER KNIVES

ProStand HD™ Cutterhead Measuring Stand With Sliding Platform

ProStand HDTM was the industry's first two-axis cutterhead measuring and set-up stand using non-contact video and digital measurement technology. It measures Radial, Axial and alignment of moulder cutterhead knife geometry. ProStand incorporates a sliding platform to accommodate cutterheads up to 14 inches (350 mm) diameter and weighing up to 400lbs (180 kg). This sliding platform allows users to safely load large, heavy cutterheads onto ProStand using hoists or overhead cranes without damage to the ProStand, or harm to the operator. Older technology comparators provide a small black shadow image of the knife edge. ProStand uses a color video camera, and large LCD monitor to provide a clear image of the knife edge magnified 20+ times. With color, inspection of the grind quality, possible cracks, defects, and bluing is easily accomplished. The built-in Digital Readout displays point locations, plus calculates arc radius, arc length and arc center points. Measurement Information can be printed to an optional label printer. ProStand is made to be used with your existing grinding shaft. V-blocks can be supplied with special spacer blocks if your shaft has different end bearing sizes. All Systems are Designed and Manufactured in the USA.

Features

- Reduces Waste caused by trial and error setups...More production = more profit.
- 20X Tool Magnification allows inspection of knife edge grind quality, plus flaws such as cracks and chips.
- A color image displays the knife edge better than shadow systems AND reveals bluing caused by excess heat build-up during grinding.
- Non-Contact Measurements = No mechanical measurement ambiguity and excellent repeatability from one user to the next.
- Easy Readout Operation: Front panel settings for Calibration, printing, units selection and more.
- Choice of Measurement Mode: Millimeters or Decimal inches.
- Radius measurements are possible by selecting three points along an arc. The readout calculates
 the arc radius, arc length, and centerpoint coordinates.
- RS232 output is built-in. Can be used with data collectors, machine interfaces, or select printer models.

Profiled Moulder Knives - Made to Order

Don't have a grinder, or grinderman? No problem! We can supply precision profiled ready to run moulder knives and grinding templates from stock or within 3 days on custom profiles after drawing approval. Prices are based on the overall length of the finished knife and include the steel and grinding labor. Return template with knives that require resharpening. All Moulder knives are made 3/4" (20mm) over the wood size; 3/8" (10mm) on each side for strength. Knives are end ground square for easy axial adjusting in your corrugated heads (no gages needed to setup heads). Knives can also be sharpened in your heads for even closer knife concentricity. A minimum setup charge applies for knives under 2" long or for orders of just one knife per profile. Please note your fence side and face up / down on drawings. Send samples or e-mail wood profiles drawings. Call for price discounts on multi-pair knife orders of the same profile and resharpening services. *Knife-Lock* and Euro-Lock 2pc carbide knives are profiled at a per inch price total for carbide and backer.

NEW!

Part # ProStand-HD-Slide

Common Pattern Abbreviations and Terminology

Tongue and Groove

T&G

CM	Center Match (T&G centered in stock)
S1S	Surface 1 Side (Top OR Bottom of Wood)
S2S	Surface 2 Sides (Top AND Bottom of Wood)
EV1S	Edge V, 1 Side (aka V1S)
EV2S	Edge V, 2 Sides (aka V2S)
E&CV1S	Edge and Center V, 1 Side (aka V&CV)
E&CV2S	Edge and Center V, 2 Sides
EB1S	Edge Bead, 1 Side
EB2S	Edge Bead, 2 Sides
E&CB1S	Edge and Center Bead, 1 Side
E&CB2S	Edge and Center Bead, 2 Sides
EE	Eased Edge radius found on lumber studs
Lap	Length of overlap in a shiplap pattern.
Reveal	Gap showing when wood pieces are
	assembled (aka penny gap or nickel gap)

ACECO. FINGER JOINT CUTTERS

We offer a complete line of finger joint knives for cutting joint lengths from 1/8" to 1-1/2" long in High Speed Steel, Carbide Tipped or Solid Carbide, and treated M2 steel* to extend run times between re-sharpenings. Knives are precision made by *AceCo*. to tolerances as close as +/- 0.0001". High Speed Steel finger joint knives are resharpened normally every 2 to 4 shifts, depending on the material density and joint length. Most knives can be resharpened several hundred times for years of grindable life. Carbide tipped knives allow you to finger joint abrasive materials like LVL, Plywood, and MDF. Finger joint knives must be properly balanced, sharpened, and posted in order to maintain a high quality finger joint. **Super strong "Micro-Joints"** save wood fiber. Just by shortening your finger joints 1/8" you can greatly reduce tear-out and save tens of thousands of dollars per year, per machine in wood fiber. Knives also offered in: Flash Chrome, Case Hardened and RW90 Diamond Coated treatments to extend life.

FJ Heads Setup Stands

FJ Cutters

Hook Grinding Gages

Depth Gage

We offer *AceCo.* precision finger joint heads for all production finger joint machines including; IWW Industrial Woodworking, Western Pneumatics, Cader-Tech, Dimter, Grecon, Taihei, Kikukawa, Dubus, Sauter, Omga, and more. Heads from 2 to 20 knife stacks are available for production rates up to 300 blocks/min. We can supply heads with Hydro-Locking sleeves or with Cone/Collet bores for any diameter spindle. Finger joint heads can be assembled to cut a variety of joint styles including: Reversible, Male/Female, Re-saw, and Feather Joints. We offer a full selection of replacement parts for all your finger joint cutter heads. Most standard items can be delivered quickly; head nuts, bolts, grease fittings, washers, cones, index spacers, and more. We also supply safety lock collars, setup stands, hook grinding gages, and grease gun parts. *AceCo.* 10-Post Setup stand is used for quick reposting of cutters and are offered in 2 to 20 post configurations. Use a finger joint depth gage to make trim saw adjustments quick and precise the first time. A must for closed joints.

FINGER JOINT WHEELS AND CUTTERS

CBN & Diamond Facing Wheels

We offer many grinding wheel styles and sizes to match your existing grinder. We provide a full line of wheels with various diameters, grits, bonds, and hardness in either Aluminum Oxide, Blue Ceramic, CBN, or Diamond wheels. We can custom match the proper wheel for your needs and your specific grinder and application. Our radius edge CBN wheel for resharpening finger joint cutters - Regrinds the knife gullets as you face grind - helps to reduce the chances of knife breakage. Use a 1/4" radius for most AceCo cutters and 1/8" radius for most Wisconsin Knife cutters. All stock wheels are 1.25" bore / 80 grit.

Finger Joint Grinding Wheels

(Type 11 Flaring Cup Wheel - for Roughing Grinding FJ Cutters.)

Japanese Style Finger Joint Cutters

Wing cutters also offer an economical way to finger joint on a shaper or tenoner. Recover your shop fall down or scrap blocks and produce high value finger jointed components for as little as a few hundred dollars in tooling costs. We offer wing cutters to either produce small gaps at the ends of the joint, or closed up without a tip gap. If you are exporting your products outside North America your customers may request the tip gap option. Wing cutters provide high strength values because of their thin pitch and thin tip design. Insert knife style wing cutters are also offered. Single inserts can be replaced at a lower cost if a tip should break off. Insert style heads offer a long term lower cost option for finger jointing on larger production machines.

FINGER JOINT MACHINE PARTS

We offer all of the wear type parts including brush strips, chain guides, bed bars, insert-rails, air pressure bags, lugs, chain links, sprockets, squeeze rolls, press feet, and more are available. Spare Parts are CNC machine to OEM tolerances, but without the high OEM prices. Chain Parts / Lugs / Insert Rails We help you keep even the oldest finger joint systems running. Hardened insert bed-rails, No-mar strips, short block chains, replacement lugs, air bags, and many others are available. Parts are made to OEM specs for nearly half the cost in some cases! We can custom make parts to fit modified machines.

We offer insert rails for most production finger joint systems. All rails are hard chromed to help extend the scribe wear life. Call for custom rails with various scribe depth or sharpness for hardwoods or to reduce scribe marks on soft pines.

Bed Rail Insert Bars

Cader-Tech	Varies
No-Mark Insert Rails (6 Scribes Per Rail)	

Extra Tall Scribe Options (.035" or .050" Tall)

RW90 Diamond Coated Scribes All insert rail scribes can be diamond plated for extra long wear, this can extend life more than 2 times.

We offer solid and multi-part lugs for most finger joint systems and chains. Custom lugs can also be made if required.

High quality standard and custom spec. block hold down brush strip bar. Standard brush strips are 3' long. Call for prices on custom sizes.

Custom lengths and bolt slots can be made to your specs.
